## RAISED ACCESS FLOOR SOLUTIONS :

Computer Floor (also referred to as raised access floor, flase floor, computer room floor, computer room raised floor, and raised computer floor) is a elevated floor area upon another floor (typically a concrete slab in a building).

The space between the computer floor and the slab allow you to cost-effectively run any of your building services, including electric power, data, telecom/voice, environmental control and air conditioning, fire detection and suppression, security and so on. Removable raised computer floor panels make it fast and easy to reach under computer floor systems

Raised access floors provide the most-efficient and cost-effective solution for managing electrical and signal cable management, as well as providing the most-efficient distribution of chilled air throughout the data center.

Access floor panels with factory-bonded HPL/Vinyl finishes have become the standard in data centers because of its ease of maintenance and its unique ability to dissipate static electricity.

Raised Access Flooring systems eliminate the need for embedded wiring and provides instant access to wiring and cabling, allowing for quick and easy reconfiguration.

Raised Access Flooring offers Maximum flexibility for the installation and reconfiguring of services to equipment and workstations a matter of hours.

**DESIGNTECH ENTERPRISES (DTE)** (Importers & Distributors) offers complete raised access floor (Raised Flooring) solutions for architects, contractors, building owners, facilities managers, telecom sector, and any one needing the convenience of an elevated floor.

We provide complete range of Raised Access Floor Systems (Raised Access Floor Tiles & Complete Accessories) for all over Pakistan ( Karachi / Lahore / Islamabad / Other Cities )

## Our Solution and Services

Our services include the installation of raised flooring with adjustable pedestals. The Tiles will be placed on the pedestals; Pedestals will be glued & screwed to the ground for additional security. Earthing braid Wire will be attached to all pedestals and then finally attached to the grounding terminal. Installation of the wall skirting on the side walls and ceiling the joints will be done as required. The job is completed by professional team of workers.

## **RAISED ACCESS FLOORING :**

**DESIGNTECH ENTERPRISES (DTE)** offers a vast range of Raised Access Flooring suitable as per client requirement.

### **HPL (High Pressure Laminate) Raised Flooring:**

Most equipment & computer rooms have a surface covering known as High Pressure Laminate(HPL). HPL has become the standard in equipment & computer room design because of its ease of maintenance and its unique ability to dissipate static electricity.

Raised floor tile size 600X600mm, with HPL (High Pressure Laminate) cover, made of highly compressed chipboard. The bottom side is covered with a galvanized steel sheet for reinforcement the load bearing capacity. The edges are sealed with a special edge trim. (Fire resistance: 45 minutes on 1000 degree centigrade), raised floor tiles are static control.

### **METAL / STEEL Raised Flooring:**

Computer Raised Flooring Panels (Imported)of module 600x600mm. Heavy duty tiles using metal sheet at both sides with non-conductive antistatic top surface and infill.

## VINYL Raised Flooring:

### Vinyl Raised Floor Finishes

Almost every floor system finally has a covering.

A wide variety of finishes can be applied but there are many advantages to factory bonding. Use of tested adhesive systems ensures a consistently high standard of finished products.

## PERFORATED Raised Flooring:

### Perforated Panels

Perforated Raised Floor Tile ( Ventilated Raised Floor Tile ) provides superior cooling for managing heat loads in mission critical facilities. These perforated Raised Floor Tiles allow for free flow of air.
